

# User Account Settings

## Why is "Provider Services" and " Associate Services" option same in MTDVAT. If there is a difference, What is it?

The **Provider** and **Associate services** are distinct. In the **Provider services**, you will see different providers/services such as "**Mobile Payslip**", **CIS e Statement, P60/P45/P11D, MTDVAT, and Agent Authorisation**. In the **Associate service**, you will only see "**Mobile Payslip**" and **CIS e-statement, Employee payroll Details**. With Mobile Payslip, you will be able to activate your employee account as your associate login. With CIS eStatement, you can activate your sub contractor account for your associate login.

**PS** :Using Mobile Payslip we can activate employee account as an associate login and using CIS eStatement we can activate a sub contractor account as an associate login.
